RETURN OF THE JEDI

■ Grab your lightsabers because a new Star Wars game is heading our way. Unlike recent titles in the franchise, **Star Wars Zero Company** will offer some turn-based strategy to go with the usual blasters and battleships. We'll get to control a gang of mercenary misfits trying (wait for it...) to save the galaxy! Let's hope the force is with us when the game drops next year.

NEWS

RACING TO THE CINEMA

■ Video game movies are fire right now thanks to the likes of **Minecraft** and **Super Mario Bros.** But we were still not expecting Sega to announce a film version of **Outrun**, its classic racer that hasn't had a new game for 16 years! They'll be hoping it follows **Sonic** as another mega movie hit.

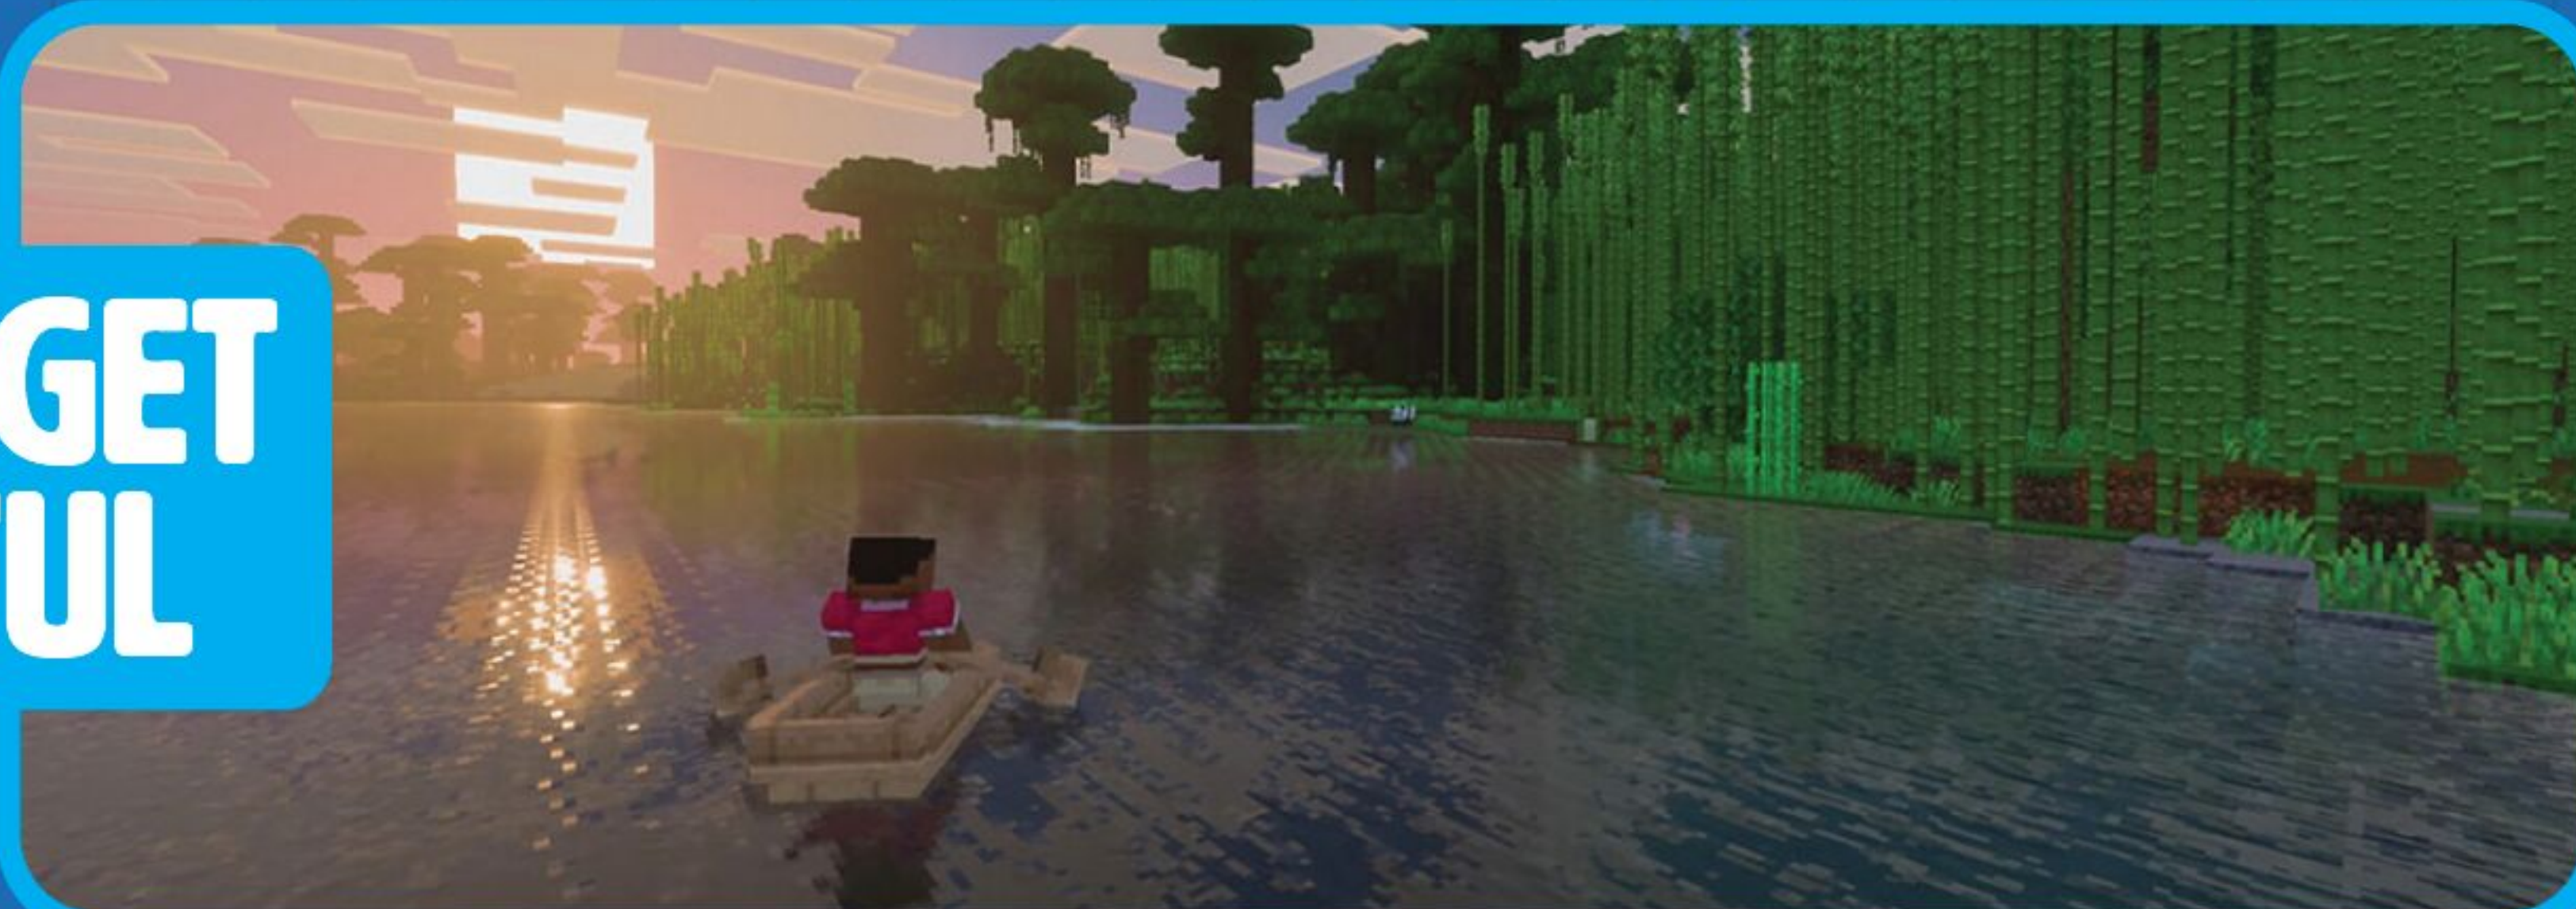

MARVEL GOES OLD SCHOOL

■ Marvel has revealed a retro side-scroller where you can smash through goons as Spider-Man, Captain America and plenty more. Even better, **Marvel Cosmic Invasion** will let us mix and match characters for special abilities. We're pairing Wolverine and Venom as soon as this lands later this year!

BIOMES GET BEAUTIFUL

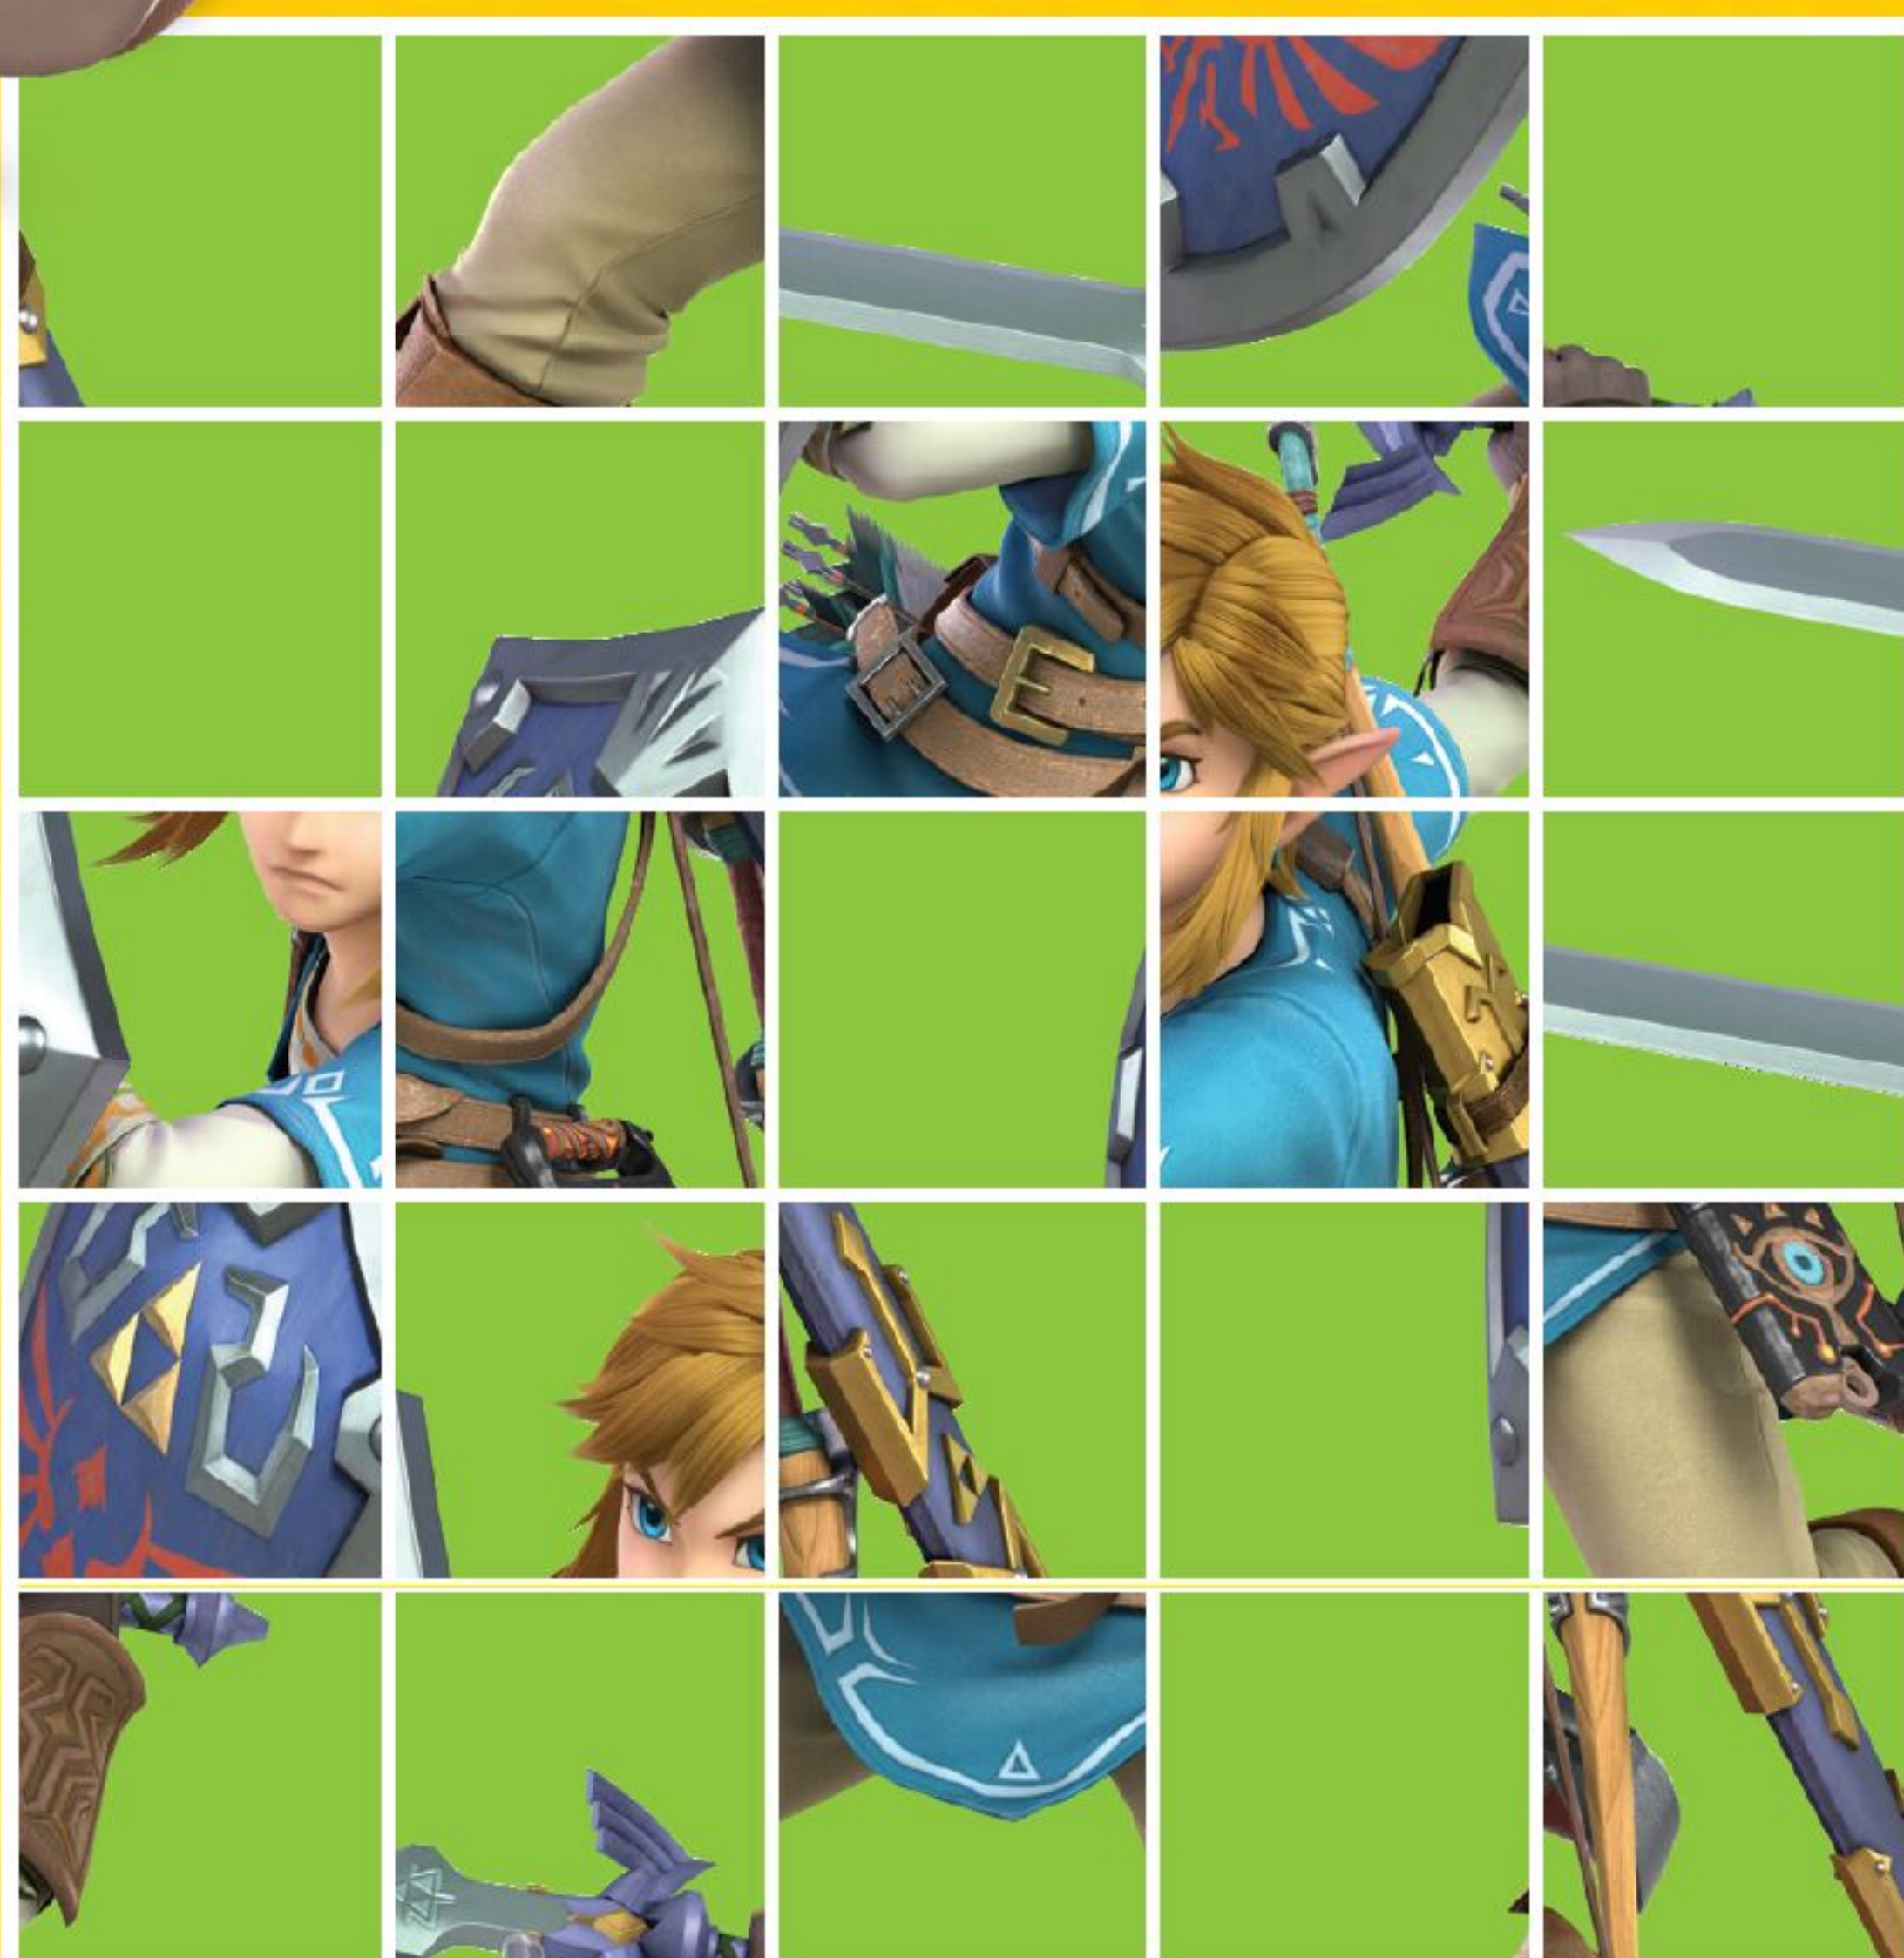

■ **Minecraft** is getting a major graphics upgrade that will overhaul your Overworld! The **Vibrant Visuals** update is boosting stuff like lighting, weather and reflections to leave the whole thing looking better than ever. You might be too busy gazing to notice the Creeper skulking up behind you!

G

is for **GLIDERS**

Does style even matter when you're **dropping into a game**? Duh, of course it does. **The best way to show your style** on the ride down to your favourite drop spot is with a **sick glider!**

H

is for **HEALTH BAR**

It's easy to forget about your **health bar** in the heat of the moment but it can help **influence your decisions** in a firefight! Should you heal? Should you rush? Should you run away? **Peep at your health bar** and make a smart move!

I

is for **ITEMS**

Who doesn't love a good **chug splash** to fill up your shield bar? **Items and consumables** can be the difference between an early elimination and a **Victory Royale**. So, **stock up on supplies!**

J

is for **AGENT JONES**

He's been around **longer** than anyone can remember and he's a **living legend** in Fortnite - he's so cool he makes ice cubes look warm! He's a key member of **The Seven** and the **Imagined Order**.

K

is for **KEYCARDS**

If you want the best loot you'll have to hunt for **keycards!** They open vaults in specific locations, but the catch is that **only certain keycards open specific vaults**. Oh, and you normally have to **beat a big boss** to get your hands on one!

M

is for **MEOWSCLES**

Ahhh, the '**swolest cat**' in the land - Fortnite wouldn't be the same without him. He's **died three times** over the last few chapters but, lucky for him, he lives on **because cats have nine lives!**

N

is for **NPCs**

Non-playable characters, or **NPCs** for short, are scattered around the map and normally hang out where the **good loot is!** They're normally **easy to eliminate**, but if you run into a boss then you'll need to **call for backup!**

O

is for **FORTNITE OG**

The original maps from **Chapter One's** seasons were rereleased a while back and delivered a **huge hit of nostalgia** for gamers everywhere!

L

is for **LEGO FORTNITE**

The mode of the century! **LEGO Fortnite** is the best thing since, well, Fortnite! **It's a huge mode** that's a little like Minecraft and has a **build feature that is SOOO satisfying**. If you haven't tried it out yet, then what are you waiting for?

P is for PEELY

Are you **bananas** about Peely? We are! He's probably **the most iconic character** and he's one of **Agent Jones's best friends!** Don't be too rough with him, he **bruises easily!**

Q is for QUADS

Duos are good, but there's nothing like dropping in with a **full squad with three other mates.** Quad games are where you'll have some of **the best Battle Royale experiences ever!**

R is for RARITY

Who wants a common weapon when you can have a **glowing mythic one?** The rarer the weapon, the **higher the damage!**

S is for SHADOW

Shadow is the **spy and military group led by Midas.** They are the evil side in the **Spy Wars** and used to have illegal operations at **Slurpy Swamp** and **Steamy Stacks.** For now, they're set on being **the biggest spy faction** in the land!

T is for THE SEVEN

This group of **robot-like heroes** swore to protect the **Zero Point** at all costs when nearly all hope was lost. **They succeeded,** but are all currently dead or missing. Hopefully some of them will return to the game soon!

U is for UPDATES

It's **annoying** when you have to **wait a few minutes** for an update to install. What isn't annoying is when it finishes and there has been **loads of cool stuff** added to the game. Totally worth the **5-minute wait!**

V is for V-BUCKS

If you want the **coolest customisation** then **V-Bucks are vital.** We think the **Battle Pass** is the best way to spend them because you get way **more bang for your V-Buck!**

W is for WINNER

We don't think there's anything that feels better than a **Victory Royale!** With up to **100 players** in each game it's so hard to do, but when you do get your first W **it's fantastic!**

X is for XP

The higher you place and more eliminations you get, the **more XP you earn!** You can even get **supercharged XP** if you don't play for a day or two which will help you **blast through the Battle Pass!**

Y is for YOUTUBERS

Fortnite's online community is **HUGE** and YouTubers are still making loads of **epic gaming videos!** You can also pick up tips by watching **pro tournaments** live on YouTube like the **Fortnite Champion Series.**

Z is for ZERO BUILD

If you find the **building mechanic** a little too finicky, then you should try **Zero Build!** It's a **standard Battle Royale** with **building disabled** so you can focus on the action!

EPIC OBBY CHAMPION!

FAIL FIRST!

★ Chances are you won't master a platformer or an obstacle course first time, and that's OK! Failing is the best way to learn, so if you slip off a block or miss a jump, don't worry, you'll know exactly what to watch out for next time.

TIME IT!

★ Some courses or levels have a rhythm or a timing to them. If there's a moving platform or obstacle, count the seconds between each time it moves. This will let you know when it's safe to make that jump!

WATCH IT!

★ If you find yourself stuck at a certain part of a course, and not too sure how to overcome the obstacle or what to do next, then head to YouTube! Someone else is bound to have played the same game and been stuck on the same point, so have a search for any Let's Play vids that might give you a hint.

WAYS TO WIN!

Not getting the W? Why not try...

IRL obby!

× If you're in the parkour zone but need a break from a game you're stuck at, why not build your own course in real life? Not only will it give you something fun to do, but exercise is good for your brain and helps let off steam. When you go back to your game, you might just figure out what to do!

Collect enough Chaos Emeralds and Super Sonic is your reward! Imagine Sonic but stronger, faster and able to fly.

DID YOU KNOW?

★ Back when your parents were little, Sega needed a game with some serious main character energy to take on Nintendo's Mario. **Sonic** was their answer.

★ We first met our high-speed hero in 1991's **Sonic the Hedgehog**, which blew up so big that it got three sequels in just three years.

★ At one point, the game's developers were planning to give **Sonic** a girlfriend named Madonna! But that idea got binned before it came out.

★ **Sonic's** best-known weakness is not being able to swim. His creators made him that way because they thought real hedgehogs couldn't swim either, even though they actually can.

DAMAGE ALERT!

Speed is **Sonic's** signature skill, but watch out for dangers ahead or you won't be able to slow down in time!

1 THE MORE THE MESSIER!

The first thing that grabs your eyeballs about Mario Kart World is the crazy player count. Each race now has 24 racers, double the number in Mario Kart 8. Obv, that also means double the carnage. It's a mad feeling to get blue-shelled from 1st to 21st, but the comeback wins are even sweeter!

2 KNOCKOUT ROCKS!

If Fortnite and Mario Kart had a baby, it'd probably look like MK World's Knockout Tour. This all-new game mode is basically a racing battle royale, with checkpoints at the end of each back-to-back track eliminating the slowest racers until only the fastest four remain for the final course. It's total teeth-grinding mayhem!

MARIO WORLD

6 THINGS

3 MOOOO-VE OUT THE WAY!

As you'd expect, there are some new faces on MK World's player select screen. But we didn't expect one of them to be a cow! All sorts of characters are suiting up in the new game, including a penguin, crab, snowman, bumblebee and – our personal fave – even a Goomba. It's about time they got some revenge on Mario!

MARIO KART WORLD

6 RIDE THEM RAILS!

If you like to flex your way to victory, then the new rail-grinding and wall-driving tricks are here for you. Tracks have plenty of pipes and edges you can grind, Tony Hawk-style, as well as walls for some gravity-refusing vertical vrooming. Half the time it doesn't help you win, but we don't care when it looks this sick!

WE LOVE!

ALL-NEW MARIO KART HAS LANDED
WITH ITS VERY FIRST OPEN WORLD.
WE'RE ALREADY OBSESSED, HOW ABOUT YOU?

4 DRAG RACING!

One itty bitty improvement Nintendo has made is how your player holds onto items. In every Mario Kart until now, you had to hold down a button to drag your item behind you. But in World, this finally just happens automatically. It may not be as mind-blowing as some of these upgrades, but we appreciate it.

5 WHEREVER YOU FANCY!

Grands Prix now see you drive through Mario Kart's new open world to get from one track to the next. Free Roam mode takes this a step further, letting you explore every biome without any limitations. There are tonnes of secrets to dig out, but we also enjoy just straight vibing down a highway to nowhere.

THE NETHER: SURVIVAL MODE!

LEARN ALL ABOUT SURVIVAL IN THE NETHER
AND PREPARE FOR YOUR NEXT TERRIFYING TRIP.

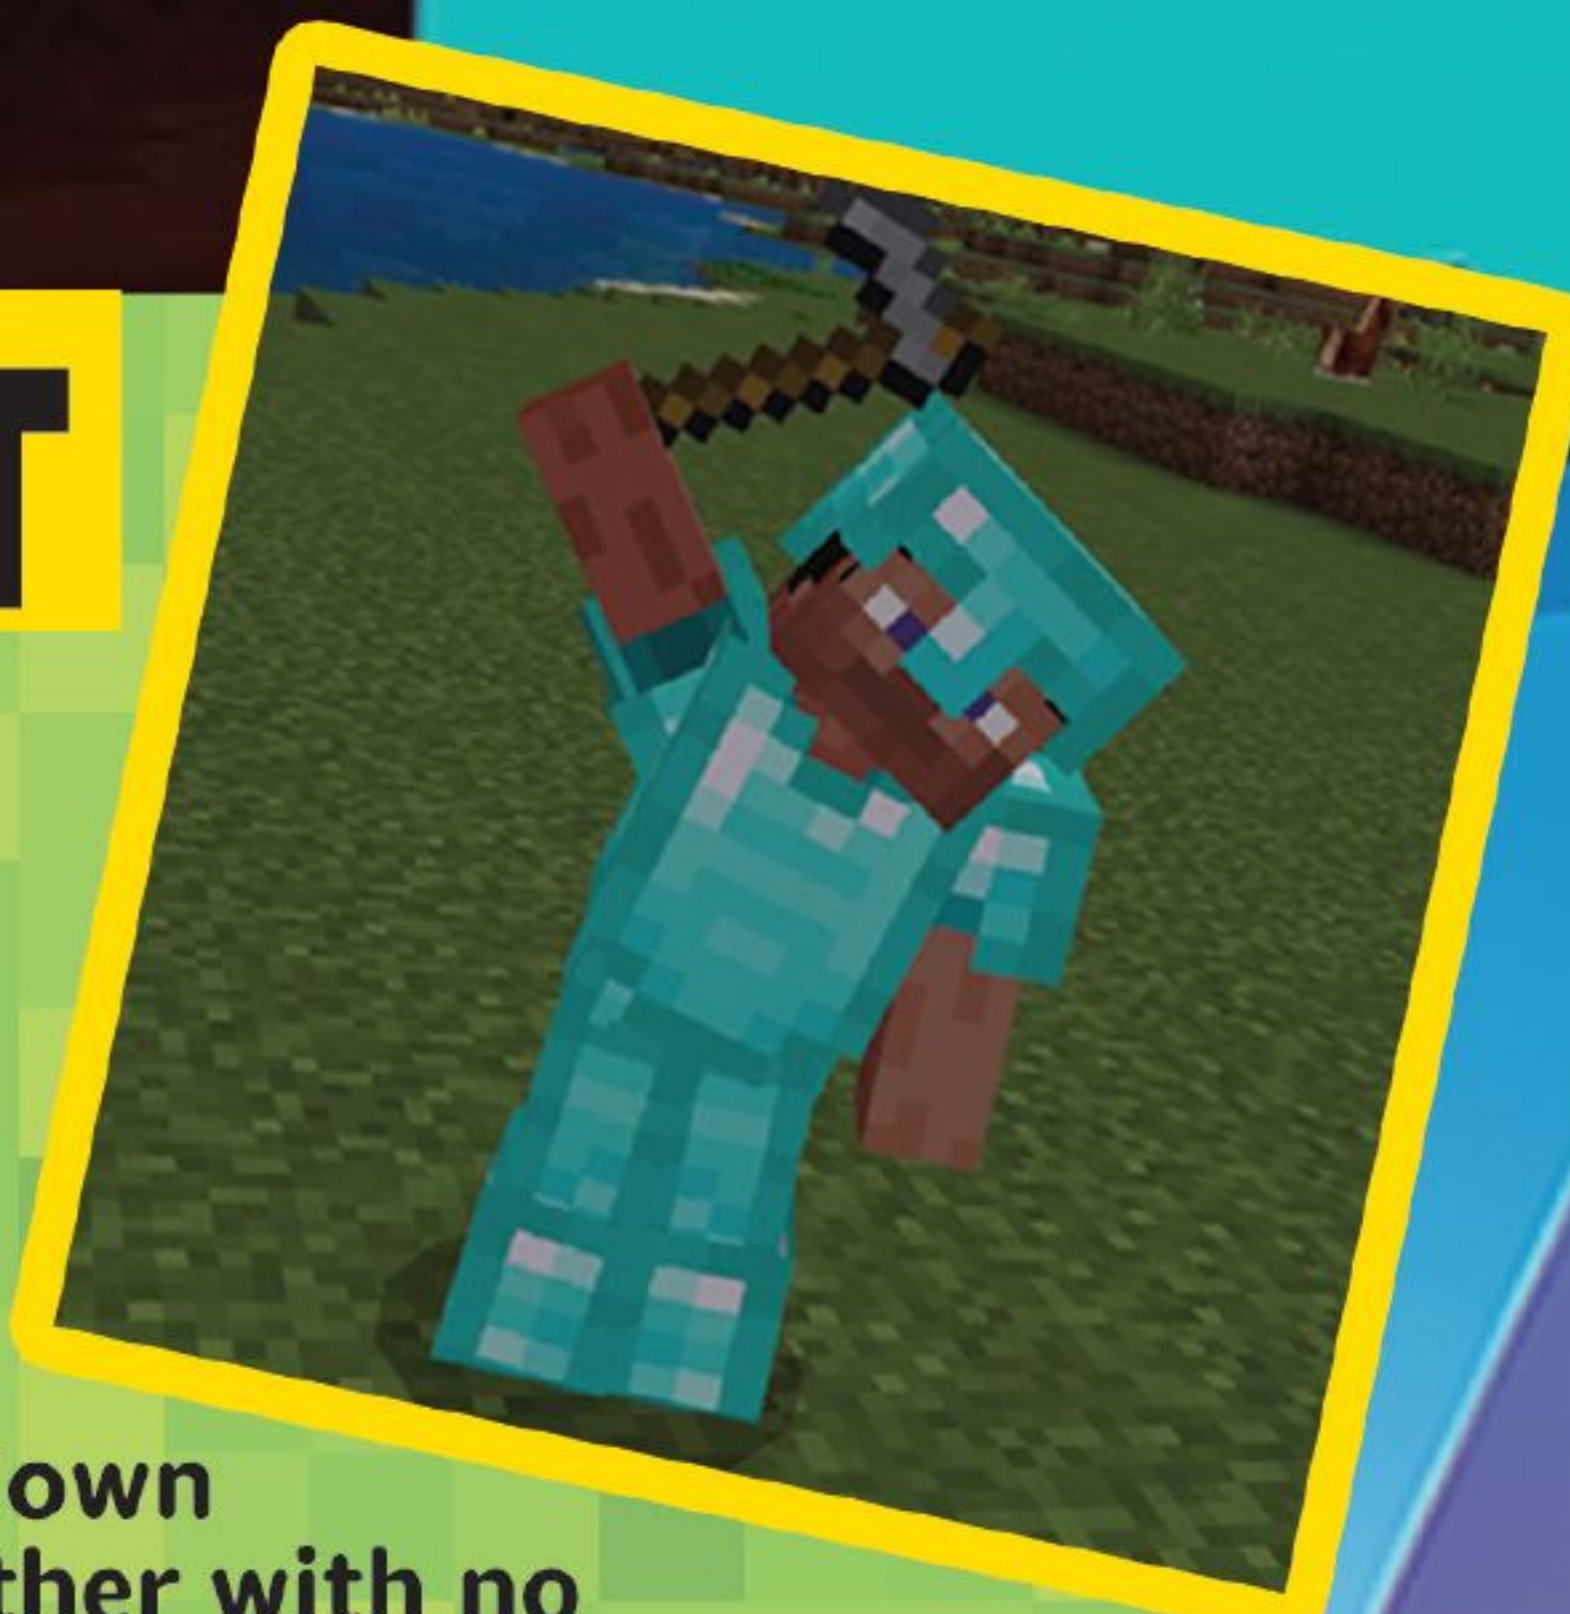

PROBLEM PORTAL!

You might know that to make a Nether portal you need obsidian blocks, flint and steel. But did you know ghasts can extinguish them with their fire balls? Don't let this noisy mob get too close or you might find yourself trapped in this dangerous dimension. Always carry back-up flint and steel!

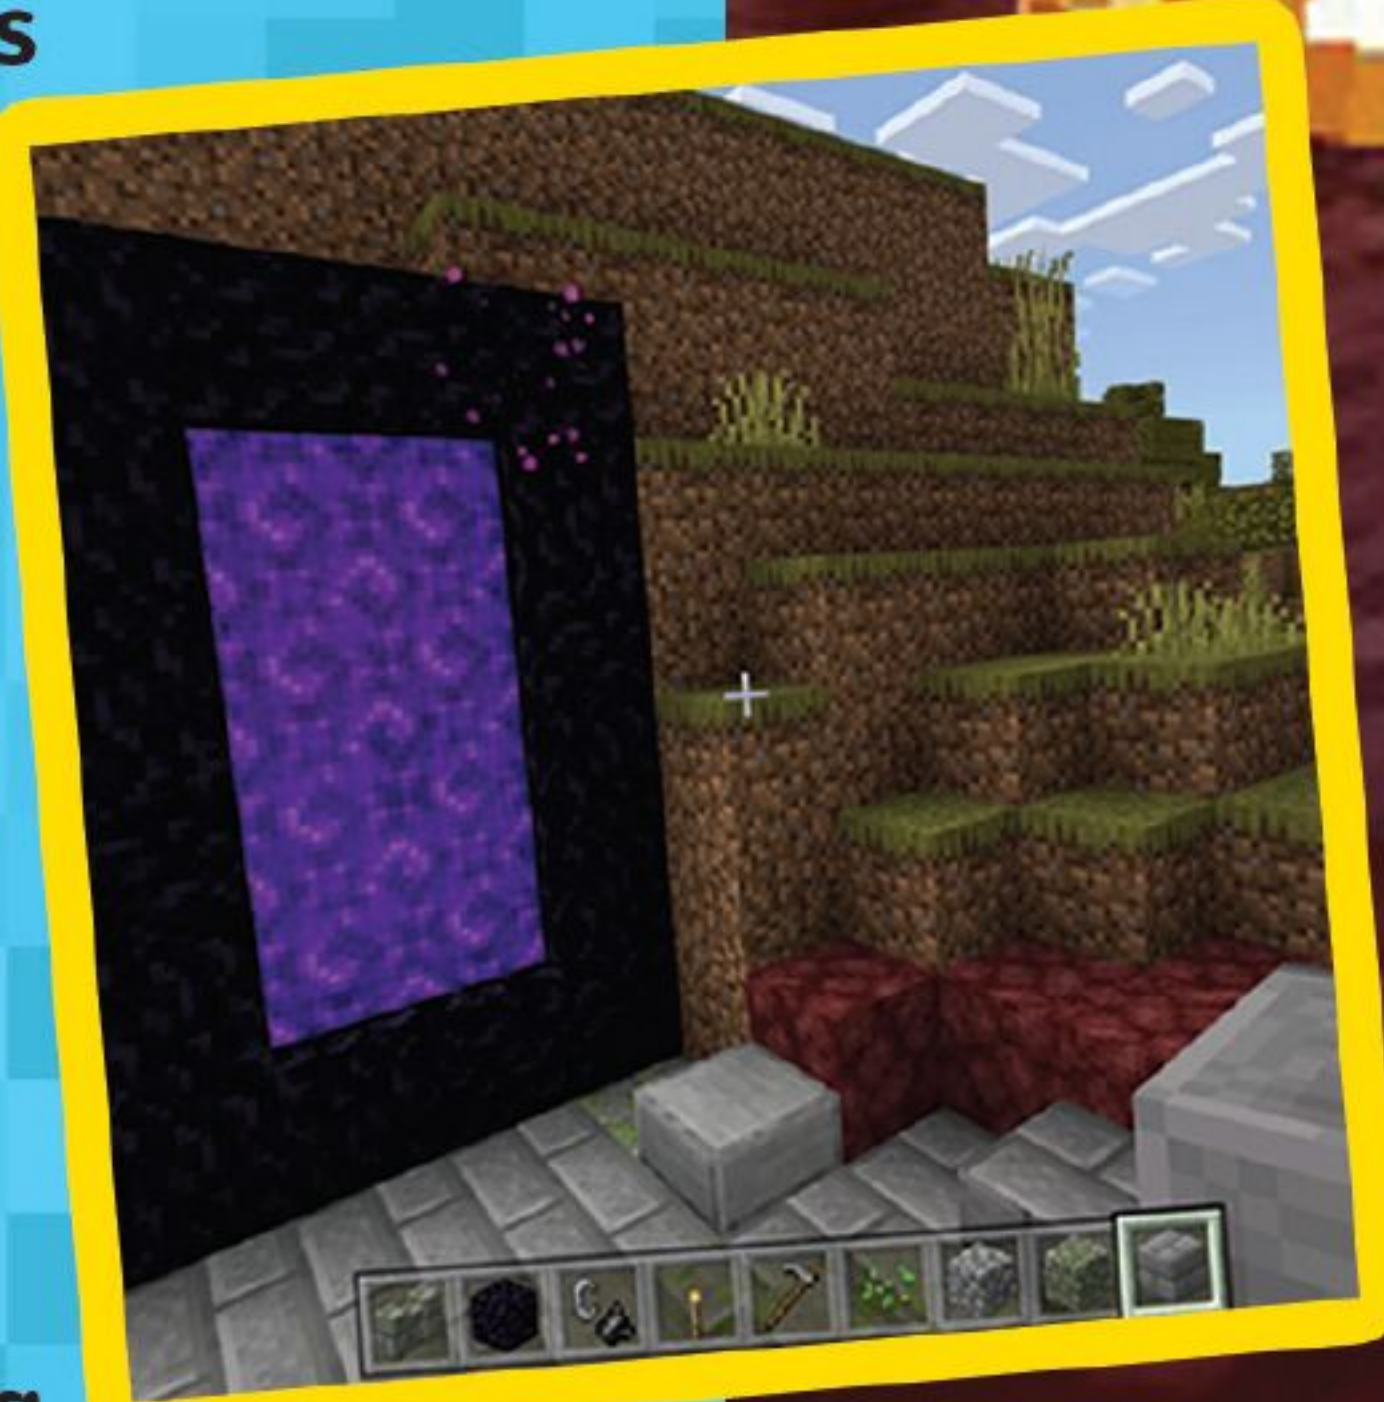

SUIT UP!

Fancy playing in hard mode? Just nip down to the Nether with no armour or items! For everyone else, grab your diamond armour, weapons and fire-resistant potions... you will need them. And remember, wearing just one piece of gold armour will stop piglins attacking you first.

NETHER NAVIGATION!

Maps and compasses are pretty useless in the Nether. Instead, build safe paths and tall towers with cobblestone to mark your way. Add torches so you can easily see where you are going. Torches can also stop some hostile mobs from spawning by increasing the light level!

TOP TIP!

Ancient debris can be mined using a diamond pickaxe. Use this along with a smithing table and template to upgrade your diamond armour to the more durable, fire-resistant netherite armour.

©MOJANG

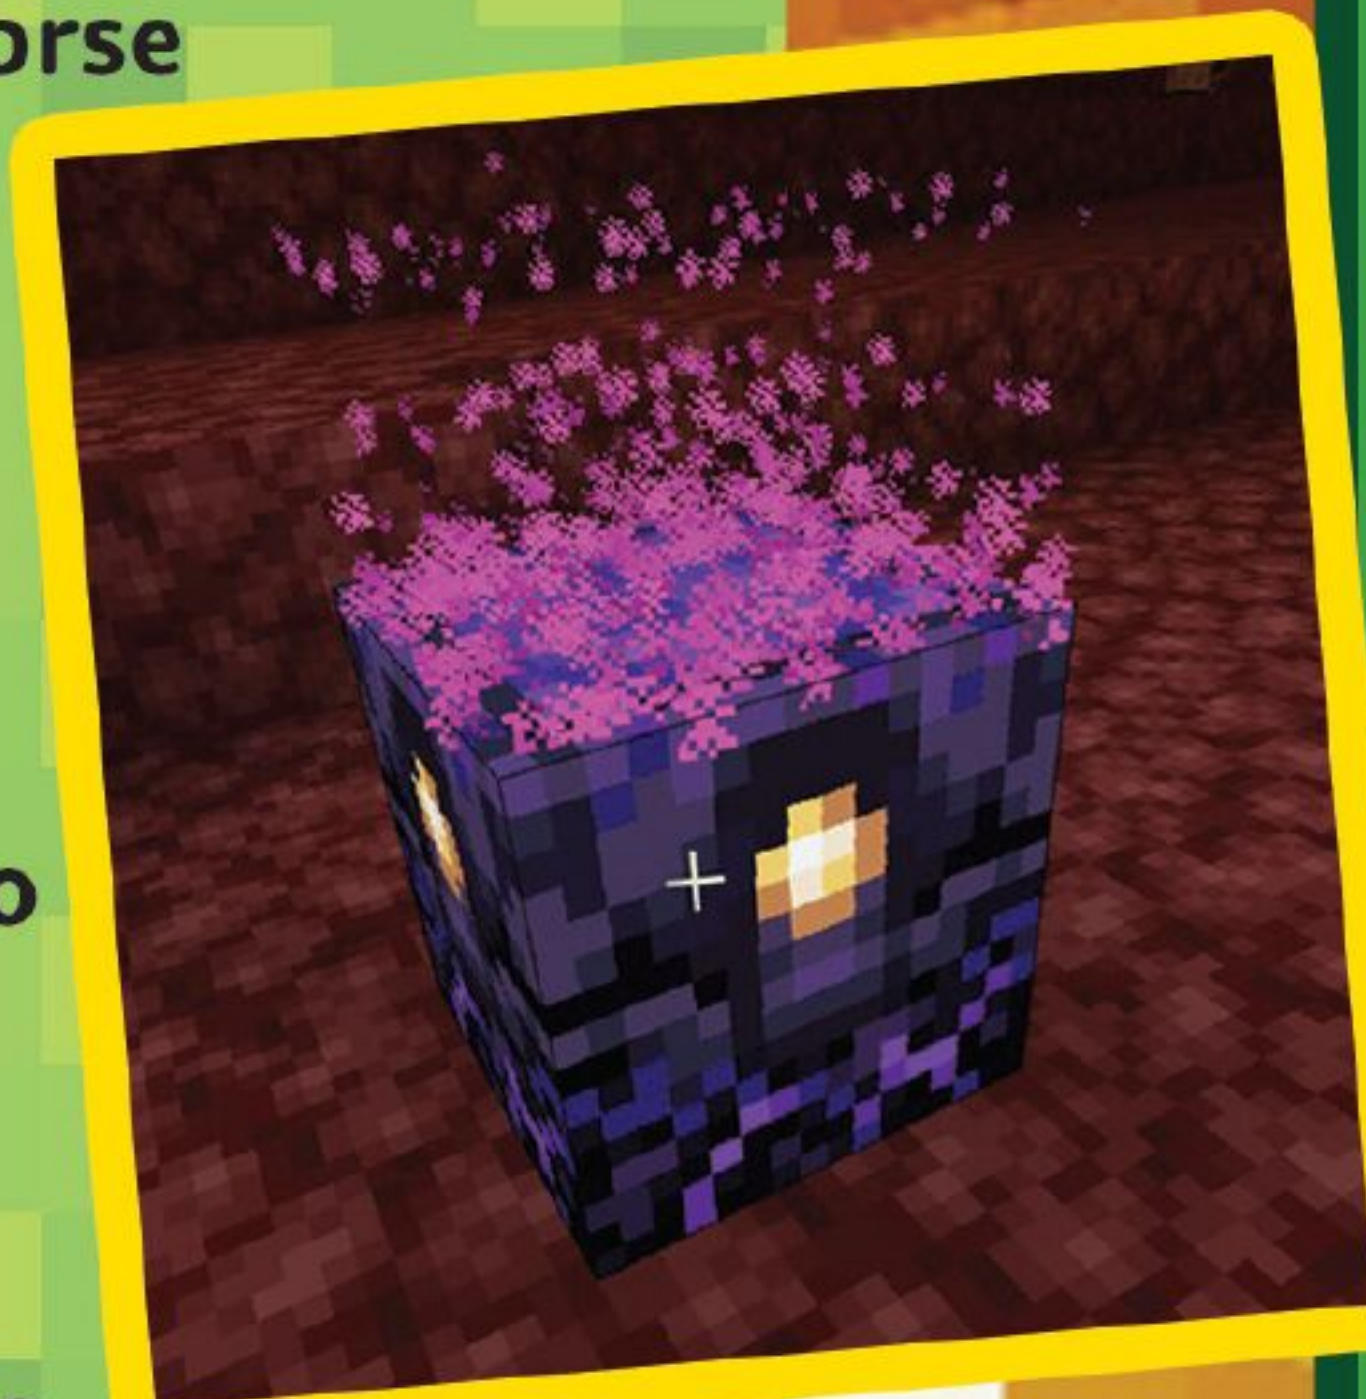

EYES OPEN!

After hours of exploring, you might be tempted to lie down. But, unless you find the sound of explosions peaceful, you are best off leaving your bed safe in the overworld where it can't spontaneously catch fire!

RESPAWN ANCHOR!

There is nothing worse than taking a tumble in the lava, respawning in the overworld and having to start again! Use a diamond or netherite pickaxe to mine a respawn anchor. Place it in the Nether, add glowstone blocks and explore the lava pools until your heart is content.

SNACKS!

Trading, planting and farming are tricky in the Nether. To even set up villages and farms, you'll need to lure villagers and animals through the portal! Planting seeds is a speedy task. If you take too long, the tilled blocks return to unusable dirt in the heat. You may stumble across some mushrooms which you can turn into soup with the help of a bowl. If all else fails, take snacks!

ROBLOX

HOW TO PLAY:

Cut out the cards along the dashed lines and then shuffle them. Take turns with a friend and try to answer the Roblox question correctly. If you answer it incorrectly, you have to do the dare! Afterwards, move onto the next question until you've gone through all the cards.

DESTROY, DESTROY!

! Throw a pot, spin through flowers, create a path of destruction. It might sound odd, but you might be rewarded with ingredients, money or something hidden to interact with!

MAKE THINGS PERFECT!

! When Zelda summons an echo, it can be moved around wherever, so take your time to arrange things how you want and bind them together. Zelda can even use monster echoes to her advantage!

DUCK AND COVER!

! This might sound like it goes against the above, but when there are enemies around, it's best not to go on the offensive all the time. Zelda can hide (and move around) in pots that give her protection!

RUN ON EMPTY!

! Did you know that Zelda can summon the echo of a bed anywhere? This handy power means you can recharge when her hearts are low, but keep your eyes peeled for creatures disturbing her sleep!

EMBRACE WEAKNESS!

! Although it might take a minute to read up on the Echo descriptions, it'll help you make the best choices when facing enemies who have weaknesses against certain Echoes.

FORGET TO DOUBLE BACK!

! Plenty of new items will be unlocked as the game progresses. So even if you think you've completed everything in the area before the first dungeon, keep exploring for surprise Rifts!
